Electronic shopping basket system, has search engine searching sources that provide items, on user `s wish or gift list over Internet to provide search results to user for adding to basket list , where system is programmable

Inventor: SHAH D

Abstract (Basic):

... The system has a shopping basket (16) and a wish/ gift list (18).A search engine searches sources that provide items of interest on a user `s wish or gift list over Internet and provides search results to the user so that the search results can be added to user `s shopping basket list . The basket and list (18) are exposed to merchant servers, so that any server can access the basket/wish...
